DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26, drawn to an apparatus/method of composing plurality of images, classified in class 348, subclass 48.
 - II. Claim 27, drawn to an apparatus for displaying composite images, classified in class 348, subclass 51.
 - III. Claim 28, drawn to an apparatus for image acquisition and warning issuance based upon said image acquisition, classified in class 348, subclass 153.
 - IV. Claim 29, drawn to a vehicular image recognition system, classified in class 348, subclass 113 and/or 148.
2. The inventions are distinct, each from the other because of the following reasons:
 - a. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, III and IV have separate utilities as specified and grouped in the preceding paragraph. See MPEP § 806.05(d).
 - b. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

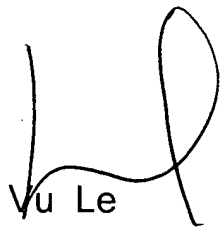

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
